

Summer Nature Programs

with Denison Pequotsepos Nature Center

DPNC is looking forward to visiting your library this summer! Our engaging and knowledgeable Nature Center educators deliver interactive, nature-inspired programs specifically for a library audience. Owls, snakes, turtles, and frogs are just a few of the animals available to come meet your library patrons!

We work with all ages, interests, and abilities and can tailor each of our programs to best suit your needs.

Programs listed on the reverse are a sampling of our nature-focused library programs; please contact us about other program topics of interest.

Have questions or ready to book?

Please contact:
Lauren Michael, Outreach Coordinator
860-572-6800 or lmichael@dpnc.org

COST: \$160 (additional travel fees may apply)

LENGTH: 45-60 Minutes

Programs can take place inside, outside, or online.

(860) 536-1216

Pollinator Power

Learn about our native New England pollinators and why they are vital to wild ecosystems! Discover their importance, what threatens them, and how kids can help. Meet a live animal ambassador and explore pollination through hands-on activities.

Seeds on the Move

Seeds don't stay in one place! Discover the many ways seeds move through the world, from wind and water to animals and people carrying, hiding, and eating them. Meet a live animal ambassador, explore real seeds up close, and try fun activities that show how seeds travel far and wide.

Every Seed Tells a Story

From a tiny acorn to a towering tree, seeds grow into the plants that create food and shelter for wildlife. Discover how seeds become habitats, and how animals help plants grow in return. Meet live animals, explore the seed journey, and create a craft to help plant native habitat in your own community.

Birds are Dinosaurs!

Did you know dinosaurs are still alive today? Explore feathers, skulls, and bones to unearth the ancient adaptations of birds that connect them to their dinosaur ancestors. Meet a live bird ambassador, enjoy hands-on activities, and unearth the incredible story of how modern birds are living dinosaurs!

Prehistoric Creatures

Travel back in time to meet the animals and plants that lived long before humans, and discover which ones are still here today. Unearth the story of ancient wildlife and meet their modern relatives!

Fun with Fossils

Fossils have a long story to tell! Take a first-hand look at real fossils, find out how fossils are made, and learn what they can tell us about the past. You'll also have a chance to make your own "fossil" to bring home!

Hidden Creatures

Some animals are masters of staying out of sight! Discover hidden creatures who hide in plain sight, come out only at night, or live beneath our feet. We'll meet real animals and learn how their special adaptations help them survive sight unseen.

Super Animal Senses

Explore the incredible senses animals use to understand the world around them! Meet live animals and discover how sight, sound, smell, and touch help our native animals find food, avoid danger, and survive in the wild.

Amazing Owls

Meet DPNC's ambassador owls and discover the adaptations that help our native owl species thrive as nighttime hunters. Get hands-on with real owl artifacts then create your own owl craft to take home.
